

Pulmonary Arterial Hypertension-Group 1: *What the Primary Care NP Needs to Know*

Start Date: 04/01/21 **End Date:** 04/30/2022

Program goal: NPs in primary care settings will obtain the knowledge to describe disease pathology, recognize symptoms of PAH, coordinate testing and diagnosis and initiate timely referral to PAH care center.

Format:

- Two online “live” webinars
- An on-demand web-based enduring activity
- A downloadable patient/provider tool

Learning Objectives:

- Describe underlying disease pathology associated with PAH Group 1
- Summarize key symptoms associated with PAH
- List evidence-based measures used to establish a diagnosis of PAH
- Identify when patients should be referred to PAH specialty centers
- Describe current evidence-based strategies used to manage PAH

Participation *(624 Web 1, 396 Web 2, 6,450 Enduring) ** (75 Web 1, 27 Web 2, 3,028 Enduring)

Unique Learners	NP	Nurse / NP student	Other APRN / Other
Registrations 7,470*	89.2% (2,789)	7.7% (242)	2% (53) / 3.1% (42)
Completions 3,128**			

Family	Adult / Gerontology	Acute Care	Other
56.1% (1754)	19% (594)	13.1% (411)	11.8% (369)

Practice setting

Family / Primary care	Cardiology	Acute care	Inpatient or Hospital / IM	Other / N/A-do not provide direct patient care
26.6% (832)	13% (408)	9% (295)	5.7% (178) / 4.3% (135)	35.4% (1109) / 5.5% (171)

(n=3,128 based on number of learners who completed pre-, post- and program evaluations)
