Women in the transformative years after age 40 have often been underserved, but their growing numbers and increasing recognition of the complex hormonal changes that begin during this period of life demand that we elevate our level of care. Join two national experts in women’s health for an engaging discussion on the unique contraceptive needs of the 40+ woman and how a combined oral contraception option may fit into a treatment strategy.

**Breakfast Product Theater**

Thursday, June 22, 2023
